Employees

Hotel Insights

Purpose of the Dashboard

It provides a real-time summary of hotel activities including guest arrivals, room occupancy, and employee count.

It brings together essential data such as guest reservations, room occupancy, and employee details in a clean and organized layout. This centralized view enables hotel administrators to track operations efficiently, monitor live check-ins and check-outs, and maintain control over daily workflows.

Reservation Summary

Shows real-time arrivals, departures, guest information, and booking status to help staff prepare and respond quickly during peak check-in hours.

# GUEST MANAGEMENT

## CENTRALIZED CONTROL

The Guest Management section provides a structured and centralized database for all guests staying or visiting the hotel. It enables owners and staff to instantly access complete guest details including name, contact information, nationality, address, and stay history.

### Search and Access:

Built with a quick search function, staff can locate any guest record using the guest's name or mobile number.

### Edit and View Options:

Staff can update contact details, verify information, or review guest history without switching screens, improving workflow speed and accuracy.

By maintaining accurate and well-organized records, the system streamlines daily operations, reduces manual searching, and ensures faster & reliable service.

**All guest information must be recorded completely before or during check-in through a structured digital form.**

### Checked In

- Indicates that the guest has successfully checked into the assigned room.
- Helps staff monitor active stays and track room occupancy in real time.

### Checked Out

- Displays once a guest’s stay is completed and the room is vacated.
- Assists management in identifying rooms ready for cleaning or reassignment.

The Partners feature connects related guest bookings for easy group management, while the View and Edit options provide instant access to review or update guest and reservation details.

### Check Out

- Facilitates the final step of a guest’s stay by closing their booking and updating room status.
- Automatically releases the room for future reservations and syncs billing details for settlement.

Enables hotel staff to create a new booking instantly through a guided digital form. Allows direct selection of guest, room, check-in/out dates, and tariff details within seconds. Reduces dependency on manual registers and ensures accurate, system-based reservation tracking.

## Centralized Order Tracking:

All restaurant orders are recorded digitally with guest details, ensuring every transaction is linked to the respective guest or room for accurate billing and tracking.

## Smart Billing System:

Automated billing with real-time Paid and Pending status updates minimizes manual errors and keeps financial records transparent for hotel owners and accountants.

## Quick Access and Control:

Options like View Details, Bill, & Print allow staff to manage orders, generate invoices, & maintain records instantly streamlining restaurant operations & improving guest service.

In-house guest bills link to their room accounts and outside guest bills generate separately.

## Smart Appointment:

Add and manage guest appointments effortlessly with real-time updates on therapist allocation, service type, & session status ensuring organized scheduling and smooth execution of every spa service.

## Integrated Billing:

Instantly generate invoices, track payments, and export records to Excel for analysis—helping hotel owners maintain transparent billing, accurate revenue tracking, and complete operational control.

# SPA MANAGEMENT

## EFFICIENT APPOINTMENT AND SERVICE TRACKING

The Spa Management module enables hotel owners to efficiently manage spa appointments, therapists, and billing — all from a unified dashboard. It lists every appointment along with the guest's name, service type, assigned therapist, price, and completion status, providing complete operational visibility.

**Spa invoices for room guests auto-sync with room billing, and outside clients appear in a separate directory.**

Download Report

Allows hotel owners to register new staff members quickly by entering key details such as name, designation, joining date, and salary structure. This ensures every employee is digitally documented and easily accessible for role assignments and performance tracking.

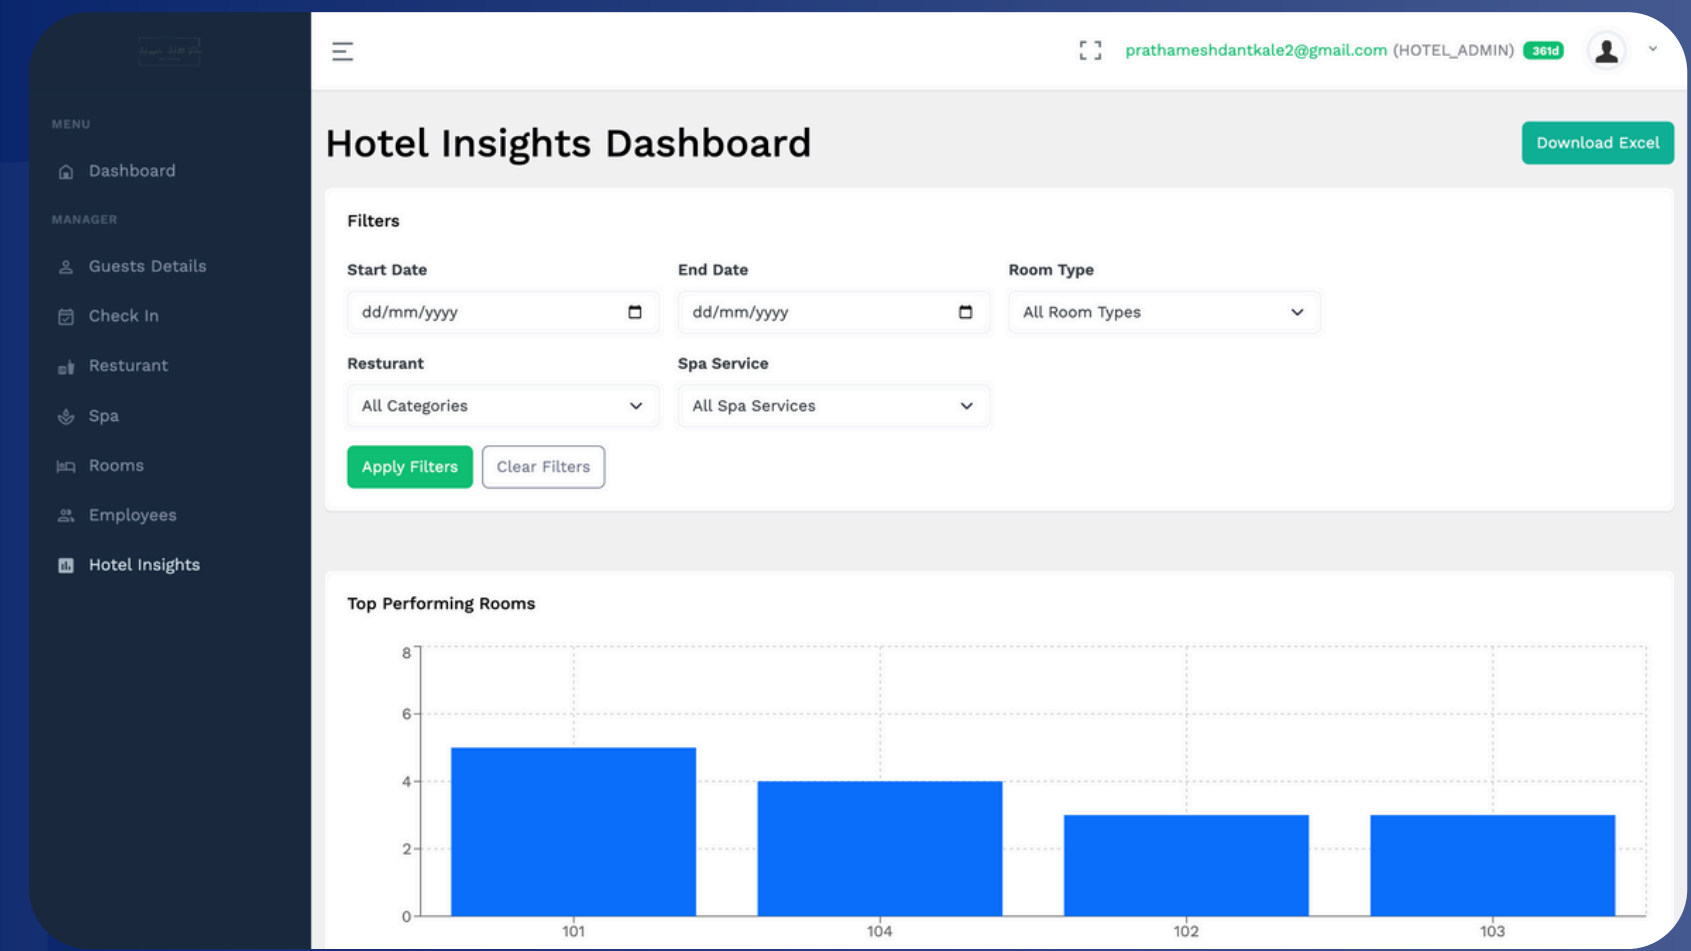

# HOTEL INSIGHTS DASHBOARD

DATA-DRIVEN ANALYTICS FOR SMARTER HOTEL DECISIONS

The Hotel Insights module provides hotel owners with a visual summary of key performance metrics — including top-performing rooms, most ordered menu items, and popular spa services. This allows management to identify trends, measure service demand, and make informed operational decisions based on real-time data.

**Displays analytics for all major departments including rooms, restaurant, and spa — with revenue, usage, and performance tracking.**

**Popular Menu Items**

Name	Category	Price	Orders
paneer	Main Course	₹200	6
Sweet Dish	Dessert	₹150	4
Pohe	Breakfast	₹50	2
Sprite	Beverage	₹20	1

**Popular Spa Services**

Name	Duration	Price	Appointments
FULL BODY MASSAGE	60 mins	₹1500.00	5

# DATA SECURITY & ACCESS CONTROL

ENSURING SAFETY, PRIVACY, AND INTEGRITY OF ALL HOTEL OPERATIONS

## Secure Digital Storage

All guest and staff records are stored safely within the system, eliminating the need for paper files, registers, or external storage devices.

## Instant Record Search

Find any guest or staff information instantly using mobile numbers or names, ensuring fast access and efficient operations.

## Role-Based Access

Every login ID is permission-based, ensuring each employee accesses only the information relevant to their department.

## Cloud-Based Backup

Automated cloud backups protect all hotel data from loss, ensuring uninterrupted access and easy recovery at any time.

# KEY BENEFITS

## Centralized Management

Operate from a single platform, reducing manual coordination and saving up to 40% of administrative time.

## Real-Time Operational Visibility

Live dashboards insights helps make timely decisions that improve occupancy and reduce booking conflicts by over 90%.

## Accurate Record Keeping

Digital entries eliminate paper logs & manual errors, maintaining 100% retrievable and verifiable data.

## Improved Financial Tracking

Automated billing & exportable financial reports give owners a clear picture of income from rooms, restaurant, & spa services.

# THANK YOU

A COMPLETE DIGITAL SOLUTION FOR SMARTER HOTEL MANAGEMENT

The Happilee Hotel Management System brings every aspect of hotel operations under one seamless digital ecosystem. From managing guest data and room status to overseeing restaurant, spa, and employee activities, the platform ensures accuracy, transparency, and real-time control.

Empowering hotels to operate smarter, serve better, and grow faster — all through one unified platform.
